

Fine Fabric Pre-Spray (B107)

Pre-spray for delicate fibers, carpets, rugs and upholstery

FOR PROFESSIONAL USE ONLY

Gentle, effective cleaning for wool and fine fabrics

CATEGORIES: Pre-spray, Fine Fabric, Upholstery

DESCRIPTION: This concentrated pre-spray is formulated with a gentle but powerful blend of solvents and detergents designed to outperform all other fine fabric cleaning products in the industry. New generation chemical technology allows for maximum cleaning power at a mild pH and the first step in the hot water extraction two-step cleaning process.

FEATURES:

- Mild-pH formula for delicate water-cleanable fabrics
- Safe for use on wool carpets and water-cleanable fabrics
- Safe for use on stain-resistant carpets

WHERE TO USE: Use as a pre-conditioning cleaner for extraction cleaning of wool carpets, colorfast wool rugs, delicate water-cleanable fine fabrics and upholstery.

USE DILUTION:

Pump Sprayer: 4 oz. per gallon

Power Injection Sprayer (1:9 model): 1.5 qt. in 5-qt. injection sprayer

USE INSTRUCTIONS:

Fine fabrics can be sensitive and vary in cleanability. Pre-test in an inconspicuous area to determine colorfastness and cleanability.

Carpet cleaning: Spray on carpet, allow 5-15 minutes dwell time. Do not allow to dry before extraction with Fine Fabric Detergent or Fine Fabric Rinse.

Upholstery Cleaning: Spray solution on upholstery. Apply extra pre-spray to areas of heavy soiling (such as arms and cushion edges). Gently agitate heavily soiled area with a horsehair brush or natural sponge for better cleaning. Extract using Fine Fabric Detergent or Fine Fabric Rinse.

COVERAGE: Makes up to 33 ready-to-use gallons. One ready-to-use gallon cleans approximately 400 square feet. Coverage will vary depending on soil level and thickness and absorbency of carpet.

USAGE TIPS: Usage is similar to Upholstery Prespray, which is a more aggressive, higher-pH detergent. Fine Fabric Prespray is safer for more delicate fabrics than Upholstery Prespray.
